Absolute and Conditional Convergence

Reading

Section 11.4

Problems

• Practice Problems: 11.4 1, 2, 5, 7, 11, 13, 17, 23, 37

• Problems to turn in: 11.4 12, 22, 26, 30

• Challenge (optional): 11.4 42, 43

Topics to know

- 1. When do we say a series converges absolutely?
- 2. Absolutely convergent series is also convergent (theorem 1).
- 3. When do we say a series is conditionally convergent?
- 4. Alternating Series (Leibniz) test (theorem 2).
- 5. Estimate for difference between limit and series (theorem 3).
- 6. Example 5 (alternating harmonic series).
