Power Series

Reading

Section 11.6

Problems

• Practice Problems: 11.6 5, 7, 9, 11, 15, 17, 21, 22, 26, 27, 35, 39, 45, 59

• Problems to turn in: 11.6 6, 10, 16, 20, 40

• Challenge (optional): 11.6 46, 48, 51, 52

Topics to know

- 1. Power series definition
- 2. Interval and Radius of convergence (theorem 1)
- 3. Examples of finding intervals of convergence (examples 1, 2)
- 4. Power series "skipping terms" (example 3)
- 5. Geometric series as a power series
- 6. Deriving other series from geometric (examples 4, 5)
- 7. Differentiation and Integration of power series (theorem 2)
- 8. Applications (examples 6, 7)
- 9. Power series as solutions to differential equations. Exponential as a series.
