Schedule

A week-by-week breakdown of the material.

Week 1 (01/08-01/12)

Day 1 Sequences (11.1). Limit of sequence. Limit Laws[1]

Day 2 Review of Calc 1, Calc2[2]

Day 3 Review of Calc 1, Calc2

Week 2 (01/15-01/19)

Day 1 Catchup

Day 2 Infinite Series (11.2)[3]

    HW 1 Due: 11.1 16, 26, 48, 70

Day 3 Positive Terms series (11.3)[4]

Week 3 (01/22-01/26)

Day 1 Absolute vs Conditional Convergence (11.4)[5]

    HW 2 Due: 11.2 12, 14, 18, 30, 34

Day 2 Ratio and Root tests (11.5)[6]

    Series tests review.

    HW 3 Due: 11.3 8, 10, 24, 40

Day 3 Power Series (11.6)[7]

    HW 4 Due: 11.4 12, 22, 26, 30

---

[6] notes/series_root.html
[7] notes/series_power.html

Week 4 (01/29-02/02)

Day 1 Taylor Series (11.7)[8]

Day 2 Taylor Series (11.7) cont[9]

    HW 5 Due: 11.5 6, 10, 16, 24, 40

Day 3 Review

Week 5 (02/05-02/09)

Day 1 Midterm 1 (chapter 11, study guide[10])

Day 2 Vectors in the Plane (13.1)[11]

    HW 6 Due: 11.6 6, 10, 16, 20, 40

Day 3 Vectors in the Space (13.2). Equations for lines in space.[12]

    HW 7 Due: 11.7 8, 12, 32, 38

Week 6 (02/12-02/16)

Day 1 Dot product and angles (13.3).[13]

    HW 8 Due: 13.1 12, 14, 20, 34, 46

Day 2 Cross product (13.4).[14]

    HW 9 Due: 13.2 14, 20, 26, 30, 35, 52

Day 3 Equations for planes (13.5).[15]

    HW 10 Due: 13.3 10, 18, 30, 38, 50

Week 7 (02/19-02/23)

Day 1 Vector-valued functions (14.1).[16]

    HW 11 Due: 13.4 14, 20, 30, 34, 44

---

[14]notes/cross_product.html
[15]notes/plane_equations.html
[16]notes/vector_valued_functions.html

Day 2 Calculus of vector-valued functions (14.2).[17]

     HW 12 Due: 13.5 8, 18, 22, 28, 34

Day 3 Conference

Week 8 (02/26-03/02)

BREAK

Week 9 (03/05-03/09)

Day 1 Arc Length (14.3).[18]

Day 2 Curvature (14.4). Normal vectors.[19]

Day 3 Functions of multiple variables (15.1). Level curves.[20]

     14.2 6, 10, 18, 26, 32, 42

Week 10 (03/12-03/16)

Day 1 Limits and Continuity in several variables (15.2).[21]

Day 2 Partial Derivatives (15.3).[22]

     14.3 4, 8, 24, 14.4 10, 12

Day 3 Differentiability (15.4). Linear Approximation.[23]

Week 11 (03/19-03/23)

Day 1 Gradient. Directional derivatives (15.5)[24]

Day 2 Review

Day 3 Midterm 2 (chapters 13, 14, study guide[25])

---

[25]notes/midterm2_study_guide.html

Week 12 (03/26-03/30)

Day 1 Chain rule (15.6).[26]

Day 2 Optimization (15.7).[27]

Day 3 Lagrange Multipliers (15.8).[28]

Week 13 (04/02-04/06)

Day 1 Integration in two variables (16.1).[29]

Day 2 Integration over more general regions (16.2).[30]

Day 3 Integrals in Polar Coordinates (16.4).[31]

Week 14 (04/09-04/13)

Day 1 Change of variables (16.6).[32]

Day 2 Review

Day 3 Catchup
